# eular

fighting rheumatic & musculoskeletal  
diseases together

The European Alliance of Associations for Rheumatology, EULAR, is the organisation which represents the people with arthritis/rheumatism, health professionals in rheumatology (HPR) and scientific societies of rheumatology of all the European nations. EULAR Member Organisations supported by its members, EULAR aims to reduce the burden of rheumatic diseases on the individual and society and to improve the treatment, prevention and rehabilitation of musculoskeletal diseases. Lilly unites caring with discovery to create medicines that make life better for people around the world. We've been pioneering life-changing discoveries for nearly 150 years, and today our medicines help more than 47 million people across the globe. Harnessing the power of biotechnology, chemistry and genetic medicine, our scientists are urgently advancing new discoveries to solve some of the world's most significant health challenges, redefining diabetes care, treating obesity and curtailing its most devastating long-term effects, advancing the fight against Alzheimer's disease, providing solutions to some of the most debilitating immune system disorders, and transforming the most difficult-to-treat cancers into manageable diseases. With each step toward a healthier world, we're motivated by one thing: making life better for millions more people. That includes delivering innovative clinical trials that reflect the diversity of our world and working to ensure our medicines are accessible and affordable. To learn more, visit [Lilly.com](https://www.lilly.com) and [Lilly.com/newsroom](https://www.lilly.com/newsroom) or follow us on Facebook, Instagram and LinkedIn.

At Janssen, the Pharmaceutical Companies of Johnson & Johnson, we are uniquely positioned and privileged to make a positive difference to the lives of patients and their loved ones, at all stages of life.

In Ireland, we employ over 1,400 dedicated individuals<sup>1</sup> across our commercial and manufacturing sites in Dublin and Cork who are inspired to help find new and better ways to prevent, intercept, treat and cure some of the most complex medical challenges of our time. Building on over 100 years of scientific heritage, we focus our efforts on developing transformational treatments for patients across six distinct areas of healthcare:

- Oncology
- Neuroscience
- Infectious diseases and vaccines
- Immunology
- Cardiovascular and metabolic diseases
- Pulmonary hypertension.

We work in trusted, transparent partnerships with patient organisations, healthcare professionals and the Health Service Executive to make a real difference where it matters most.

“A biotechnology innovator since 1980, our science-based heritage is at the heart of everything we do. We develop medicines for hard-to-treat illnesses in areas of high unmet patient need. With around 600 staff in the UK and Ireland, we are committed to driving sustainable solutions for healthcare systems that empower patients to take ownership of their care” [www.amgen.co.uk](http://www.amgen.co.uk)

Pioneering in neuroscience, Biogen discovers, develops, and delivers, worldwide, innovative therapies for people living with serious neurological diseases in addition to related therapeutic adjacencies. One of the world's first global biotechnology companies, Biogen was founded in 1978 and has a portfolio of medicines and potential therapies in neuromuscular, neurodegenerative, acute neurology, and ophthalmology disease areas. Biogen believes that biosimilars, and their associated cost savings, are fundamental to safeguarding future healthcare. Biogen has a 20-year, \$250 million initiative to address the issues of climate, health, and equity, to eliminate fossil fuels, to increase sustainability and improve human health.
